

「豊かな人間性、高い倫理性、科学的論理性を備え、創造力に富み、多様な学問的素養を身に付け、医学分野、特にトランスレーショナルリサーチにおける国際的共同研究を推進し、医学と人類の福祉の発展に著しく貢献できる人材」
を養成する

“To produce graduates who are of well-rounded character with high ethical standards and scientifically logical minds, and creative and well-versed in a variety of academic fields. We are looking for those who can promote international collaborative research and contribute remarkably to the development of medical science and human welfare.”
